

Digital Assistive Listening Compact Receiver Set—Wall Mount

Type: NX-DAL-RX2w

Overview

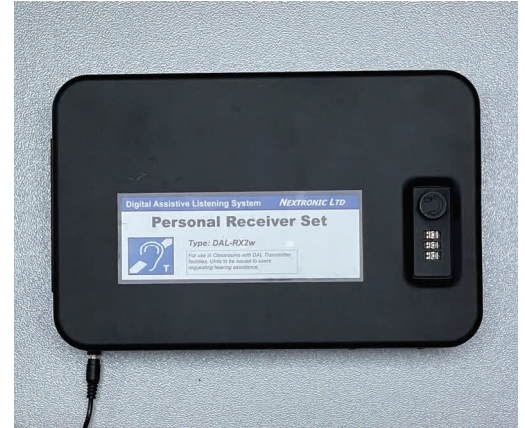

The DAL-RX2w Digital Receiver set has a compact case with only 2 unit receivers for smaller rooms where assisted listening is required less often. It forms part of the NX-DAL Assistive Listening system, which offers significant benefits for hearing impaired users over traditional AFILS listening systems:

- Simpler installation,
- Easier to manage,
- Better audio quality

The DAL Receivers are kept charged and ready to use, in a lockable wall mounted storage case located in the room. Equipment management is easy, since when requested, a hearing impaired user can be issued with the Receiver and their preferred earphone. Simply turn the unit on and adjust the volume to use. At the end of the session, the Receiver is returned to the case.

The Charger/Storage Case set comprises:

- Wall mounted code Lockable Case
- 2x DAL Personal Receivers
- 1x Bone Conduction Headsets
- 1x High Quality Stereo Headsets
- 1x Earphone -mono ear hook type
- 1x Induction Loop -Neck loop
- 2x Charging leads (USB-C type)
- 1x Mains PSU 12v Plug-in
