

Digital Assistive Listening Portable Receiver Set

Type: NX-DAL-RX4-P

Overview

The DAL-RX4-P is a portable Digital Receiver set, that is part of the NX-DAL Assistive Listening system, which offers significant benefits for hearing impaired users over traditional listening systems.

A set of 4 personal receivers are kept ready charged in a portable storage and charger case, together with a selection of hearing options for the users preference. Earphones can be the users own (3.5mm jack) or single ear hook type, or induction neck-loop, or neckband Bone Conduction type, which is a good option for hearing aid users since they can be worn alongside the ear.

The Storage Case set comprises:

- Compact Lockable Case (35x25x12cm)
- 4x DAL Personal Receivers DAL-RX1
- 2x Bone Conduction Headsets
- 2x Stereo Headphones
- 2x Induction Loop - Neck loop
- 2x Earphone - single ear hook type
- 4x Charging leads (USB-C type)
- 1x Set of hygiene cleaning wipes
- 1x Mains charger PSU
